**NATIONAL ENVIRONMENTAL POLICY ACT (NEPA) DOCUMENTATION FOR 690
TRAILER CLUSTER - KDT-094-97**

Action: Transmit the attached Draft Categorical Exclusion (CX) to DOE.

PURPOSE

The purpose of this memorandum is to transmit the attached Draft Categorical Exclusion (CX).

DISCUSSION

Please transmit a copy of the draft categorical exclusion to R. W. Tyler, DOE, RFFO for review. The CX and a sample letter have been attached.

RESPONSE REQUIREMENTS

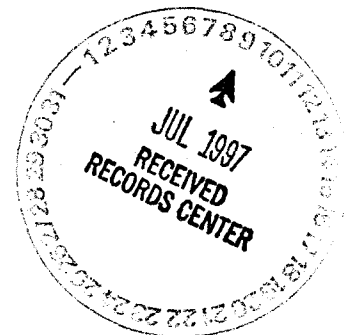

Please provide a copy of the signed NEPA Categorical Exclusion (CX) when you are in receipt of the signed determination. If you have or need additional information, please contact Mark Hickman, X7145.

DOE NEPA REGULATIONS SUBPART D
CATEGORICAL EXCLUSION (CX) DETERMINATION - RFFO/CX00-97

Proposed Action: Relocation of T690J and N

Location: Rocky Flats Environmental Technology Site, Golden, CO

Proposed by: U.S. Department of Energy Rocky Flats Field Office (DOE, RFFO)

Description of the proposed action:

The Rocky Flats Field Office proposes to relocate trailers T690J and T690N from their present location west of Bldg. 883. Utilities at the trailers' present site will be disconnected, capped, and abandoned in place. T690J (a single trailer) would be relocated to the Southeast (905) Contractor Support Yard on what was the site of T891I so no new tie downs or utilities would be needed. T690N (consisting of two modular units) would be relocated to a previously-unoccupied site north of T124A. A trench approximately 40 feet long would be excavated to bring water to the trailer from the west and an approximately 55-foot long trench would be necessary to take sanitary sewage to an existing line southeast of the new site. No additional utility poles would be necessary. Soils from excavations for utilities and tie-downs would be replaced in the excavation from which they came or distributed at the site. The locations of both new sites are in the developed area of the Site adjacent to existing roads and utilities. (See also related RFFO/CX00-97)

Categorical Exclusion to be applied:

B1.22 Relocation of buildings (including, but not limited to, trailers and prefabricated buildings) to an already developed area where active utilities and currently-used roads are readily accessible.

Justification:

The project consists of the relocation of trailers to an already-developed area where active utilities and currently-used roads are readily accessible.

I have determined that the proposed action meets the requirements for a categorical exclusion as defined in Subpart D of 10 CFR 1021. Therefore, I approve the categorical exclusion of the proposed action from further NEPA review and documentation.

DOE NEPA REGULATIONS SUBPART D
CATEGORICAL EXCLUSION (CX) DETERMINATION - RFFO/CX00-97

Proposed Action: Removal of Trailers T690A-I, K, L and M, T371G, and T444A

Location: Rocky Flats Environmental Technology Site, Golden, CO

Proposed by: U.S. Department of Energy Rocky Flats Field Office (DOE, RFFO)

Description of the proposed action:

The Rocky Flats Field Office proposes to remove the following 14 trailers or trailer groups (multiple trailers combined to form a single structure): 690A through I, K, L and M, 371G and 444A. The trailers have been used for office or similar purposes; one trailer houses showers. All units will be surveyed for hazardous (including lead, asbestos and PCBs) and radioactive contamination where there is any reason to suspect their presence. Any contamination will be dealt with in accordance with applicable regulations and workers will wear appropriate protective equipment. All utilities to the trailers will be disconnected; underground utilities will be capped and abandoned in place. T690A will be demolished and the resulting wastes recycled to the extent feasible or sent to a landfill for disposal if appropriate. The remaining 13 trailers will be taken to the Site's Property Utilization and Disposal Yard for disposal through DOE's property utilization and disposal process. See related RFFO/CX00-97.

Categorical Exclusion to be applied:

B1.23 Demolition and subsequent disposal of buildings, equipment, and support structures (including, but not limited to, smoke stacks and parking lot surfaces).

Justification:

The project involves physical removal and disposition of modular units which is the functional equivalent of demolishing a conventional structure. Disconnection of utilities, though potentially also covered by B1.27, is a reasonable and necessary part of the removal and disposition activities, and so is also covered by the proposed categorical exclusion.

I have determined that the proposed action meets the requirements for a categorical exclusion as defined in Subpart D of 10 CFR 1021. Therefore, I approve the categorical exclusion of the proposed action from further NEPA review and documentation.

NATIONAL ENVIRONMENTAL POLICY ACT (NEPA) DOCUMENTATION FOR
[PROJECT NAME] - YYY-XXX-97

Attached is a draft categorical exclusion for the subject project. Kaiser-Hill NEPA staff recommend that this project be categorically excluded from further NEPA documentation requirements. A draft Categorical Exclusion Determination is included for your review and an electronic copy of the draft Determination has been made available to you.

Please provide a final NEPA determination for this project at your earliest convenience. If you have any questions or need additional information, please contact [PROJECT CONTACT AND EXTENSION].
